PROJECT: Main to Junction 420 (Downtown Area)

CIP ID: 5267.046

IFB#: 6100 CLMC550

SUBJECT: Answers to Bidders Questions as of the date of this letter, per 00100-IFB Article 1.(3)(C).

**The following are answers to bidders questions received on the above project. These answers do not modify the contract. Any modifications to the Contract will be through Addenda.**

Q-1: The pay item for 450 tons of HMA - can it be clarified what this is for? The pavement repair details called to be used call for flexible base and I see no other references to where a by-the-ton HMA item would be used. I was thinking we might be directed to use HMA instead of flexible base for certain areas in trench repairs or perhaps the item is for temporary asphalt where cold mix is often used?

A-1: The pavement repair shall be as called out in the trench repair details 1100S-2 and 1100S-3 on Sheet 42.

  
Paulinda Lanham, PMP
